EDUCATION

Bsc in Software Engineering

Addis Ababa University

2020 - 2025 G.C

Currently, I am in my fourth year of pursuing a Software Engineering degree with a specialization in software development.

Coding Bootcamp

Africa To Silicon Valley (A2SV)

Dec 14 , 2022 - OCT 19 , 2023

I study data structures and algorithms to enhance my problem-solving abilities.

SUMMARY

Seeking an opportunity to leverage my skills and unwavering dedication to contribute meaningfully to an organization's success. I am committed to supporting the achievement of organizational goals through my relentless work ethic, persistence, and determination. My ability to thrive under pressure, coupled with an unwavering commitment to persevere until objectives are achieved, aligns with the ethos of hard work and preparedness, making me a fitting candidate for the position.

EXPERIENCE

FullStack Developer

Asham Lole Delivery Company   July 2023 - Nov 2023| Addis Ababa, Ethiopia

- Designed and developed a custom internal working system, transitioning the company's manual processes from Excel sheets to an efficient website platform.
- Implemented customer database management, enabling quicker access to client information and facilitating improved service delivery.
- Integrated credit, expense, and income recording functionalities into the system, streamlining financial tracking and reporting processes for enhanced company operations.
- Improved overall workflow efficiency, resulting in a significant reduction in time spent on tasks and enhancing productivity within the organization.
